Remember...

When reviewing floor plans, remember to think about your family's lifestyle. How many bedrooms does your family require? Do you prefer the master bedroom separate from the other bedrooms? How many bathrooms would your family need? Do you need a large roomy kitchen, or would a small, more efficient kitchen be suitable?

These are considerations that affect the end result...maximum comfort for you and your family. Your independent dealer can help you work out the best floor plan that meets your lifestyle and budget needs.
